# Coming to fruition

Ontario wine scene pioneers Cave Spring are making huge strides in their sustainability journey and crafting some of their best wines.

Gabriel Demarco, chief operating officer and head winemaker at Cave Spring.

# LCBO SPIRIT OF SUSTAINABILITY

---

At LCBO, we're focused on building a more sustainable future through our Spirit of Sustainability initiative, which celebrates trade partners who work to promote diversity and inclusion, community investment and sound environmental practices. Learn more at [LCBO.com/sustainability](https://www.lcbo.com/sustainability).

It's an exciting time at Cave Spring Vineyard. "It's kind of surreal," says chief operating officer and head winemaker Gabriel Demarco. "It's over a decade of work that's all culminating at the same time."

Since their founding 40 years ago this year, Cave Spring have been at the forefront of Ontario wine. They were among the first to plant vinifera in Niagara, were a founding member of the Vintners Quality Alliance (VQA), and were the province's first Sustainable Winegrowing Ontario-certified winery.

"We're not passively sustainable, we're aggressively sustainable," says Demarco. "We're obsessed with finding solutions." Not surprisingly, given their history, many of these solutions are the first of their kind. Nine years ago, Cave Spring installed North America's first BioGill wastewater recycling system. This technology uses natural bacteria to reduce environmentally damaging bio-contaminants in wastewater.

They've also joined a group of companies to bring to market a new approach to an old problem: using light-based technology to control weeds. "It would be a globally novel

technology that's also gentle on the environment, and it challenges the current understanding of what you can do with lighting as a tool," says Demarco. "We are very close."

In the meantime, their five-year-old cover-crop trial launched in collaboration with the provincial government is showing excellent results. "We've found domestic weed species that can grow under the vine, not hit the fruit zone, and out-compete [harmful] weeds," says Demarco, "So no herbicides. We just have to mow it twice a year."

A sustainability journey can take you to exciting, unexpected places. "We found our own yeast," says Demarco. "When we started wild-fermenting all our table wine nearly 10 years ago, I noticed that all the tanks showed different fermentation kinetics." Demarco, who has a degree in biochemistry, took his findings to Brock University and, after following six fermentations, they found 600 strains of yeast. From there, Demarco was able to isolate and validate Cave Spring's own yeast from their 1974 Chardonnay planting. This gives Cave Spring the ability to make sparkling wine and Icewine without relying on imported yeast. Further-

more, the funding Brock University received for the project has allowed them to purchase more equipment and further their studies of native yeasts. "It's a huge step for the industry," says Demarco. "And we were the first to do it."

Cave Spring are also leading the way in the quest for locally sourced wine vessels. "We've partnered with a local concrete artisan, taken ground-up stone from the top of the Niagara Escarpment, integrated it into local concrete, and we're making domestic concrete vessels," says Demarco. "We're not purchasing and shipping containers of goods all over the globe. The concrete artisan is sourcing materials and making vessels within two kilometres of the winery." For a winery so passionately focused on expressing terroir, it's a dream come true to produce a wine that, from the fruit to the yeast to the ageing vessel, is 100% sourced from a single region.

"Even 40 years in, we're still pushing the envelope," says Demarco, "and it's really exciting."

Demarco engages his senses.

Cave Spring is at the foothills of the Niagara Escarpment, a UNESCO Heritage Site.

CHARDONNAY 2024** 🍁

VQA Beamsville Bench, Niagara Escarpment,  
Ontario, sustainable

"The average vine age for this wine is almost 40 years. It's respectful of the heritage of Chardonnay but also really owns the site it comes from. So there's a bit of French oak, but it's elegant and integrated. Any style of creamier sauce would be exceptional with this wine. I'm a big fan of having it with a firm white or softer brine cheese from the Upper Canada Cheese shop down the street from our winery." Gabriel Demarco

"We unapologetically make Cab Franc that's 100% Cab Franc. It's 100% barrel-aged for 16 months in neutral oak. It's juicy and actually quite boldly structured, but its acid structure gives it an elegance. It would be great with summer barbecue, and you can also bring it into the fall and have stew with it. It can hold up to steak for sure – a flatiron steak would be its ideal red-meat pairing." Gabriel Demarco

# A CELLAR'S MARKET

The Canadian Wine Library (CWL) is a curated collection of 42,000 bottles of premium Canadian wines that demonstrate the potential and excellence that Canadian wines can offer when aged. The four wines featured here are among the 46 selected for inclusion in the CWL in 2026.

The goal of the CWL is to demonstrate the potential and joy to be discovered through the cellaring of Canadian wines. The CWL evolved from the original Ontario Wine Library in 1998, officially becoming the CWL in 2007. It has given winemakers and industry insiders the ability to follow the evolution of Canadian wines over time. Having a curated collection stored under ideal conditions at Brock University has already proven invaluable. The information gathered through

scheduled tastings, now dating back decades for many wines and sites, has generated feedback for producers, supplying them with specific information about individual wines and vineyards as well as an overall understanding of our finest cool-climate regions.

Another significant focus of the CWL is the education of consumers to establish an understanding of, and a desire to experience, the complexities, evolving aromas, and intriguing flavours and textures that emerge as

wines mature. Most wines are enjoyed long before these secondary aromas, flavours and textures can develop. The CWL hopes to see more people buying wines to both enjoy and to cellar. It's well understood that the wines of places such as Burgundy and Bordeaux offer vastly different experiences as they mature. With this ever-growing library of Canada's finest wines, the CWL is demonstrating that our wines also intrigue as they change over time.

Earning a place in the CWL is

determined by submission to a tasting panel who taste the wines blind, meaning that they don't know the name of the wine, who made it, where it came from, or what it costs. The tasters assess the wines for ageing potential and the wines are selected by vote, often following a lively debate. A debate the CWL and Vintages invite you to continue as you explore these wines over the coming years.

Vinous and reductive in the glass, this shows aromas of violets, red and black cherries and strawberries. Lush fruit on the palate, with a medium body, a supple style, ripe tannins and super-juicy acidity. Easy to drink now, but will improve in complexity in two or three years.

DOC Rosso di Torgiano

(Cantine Giorgio Lungarotti)

Spicy and smoky, this wine features a graphite-like toasty character intertwined with notes of meat, blackberries and cherries, complemented by an enhancing floral nuance. It is crisp, if not a bit nervy, on the palate, with a medium body, rose petal flavors and tight, chalky tannins resulting from a relatively light extraction. Drink now. DOC Jidvei, Transylvania

A blend of the local Feteasca Regala with French-born international superstar Sauvignon Blanc, this lively wine evokes fresh flowers, green herbs, ripe apple, pear, lemon and lime. Zippy acidity makes it a good choice for pan-fried trout, or pasta in a pesto cream sauce.

## SPAIN – RED WINE

### SAN ALEJANDRO EVODIA GARNACHA 2023

Spain

The aromatics of the 2023 Evodia give justice to the name, which in old Greek means “fragrance,” and it has high-lifted aromatics, floral, elegant and ethereal ... This is ripe, hedonistic and outspoken, showy and juicy, with very good ripeness and 14.8% alcohol, but it comes through as balanced with a pH of 3.68 and 6.1 grams of acidity. You just want to keep smelling it as it unfurls in the glass. The quality is clearly beyond its price point; it’s an amazing value for money. One to buy by the truckload! It was bottled in September 2024. Drink date: 2023-2029. Score: **92** (Luis Gutiérrez, robertparker.com, Nov. 14, 2024)

**MARQUÉS DE MURRIETA RESERVA 2021**  
DOCa Rioja

Elegant yet perfectly structured, this is the most floral of the Murrieta Reservas I've tasted in recent years. With 8% Graciano and 4% Mazuelo, the nose is perfumed with pretty rose petal and delicate red berry fruit, as well as wild herbal aromas. Blueberry fruit typical of Tempranillo directs the palate, rounded out with a little fleshy Garnacha, and framed by subtle American oak. It offers immediate appeal but will age gracefully for many years to come. Drinking window: 2025-2036. Score: **96** (Beth Willard, decanter.com, Feb. 19, 2025)

## STANDOUT SELECTIONS

Ontario is one of the few places in the world whose climate permits Cabernet Franc to achieve the perfect balance of ripeness and freshness. This allows our winemakers to make 100% Cabernet Franc wines rather than using it only for blends. Marynissen's perfumed 2023 and 13th Street's bright, complex 2025 rosé demonstrate the grape's exciting versatility and depth in Ontario. And this tantalizing wine from Cooper's Hawk showcases Ontario's terroir through one of the world's most authentic lenses: Riesling.

## STYLE SPOTLIGHT

Chardonnay is responsible for the great white wines of Burgundy, but it's truly a global phenomenon grown virtually everywhere wine is made. Ontario's soaring reputation as a fine-wine region is based in no small part on the exquisite Chardonnay produced in our cool-climate growing areas such as Niagara Peninsula and Prince Edward County.
